Coatings

GT Quartz

Company: Gliptone

GT Quartz™ Ceramic Coating represents Gliptone's® latest advancements in vehicle surface protection. GT Quartz™ uses nano silicate SiO₂ cross linking adhesion technology provides extreme depth of gloss and shields the surface from UV and harmful pollutants; bird droppings, acid rain, road grime, salt, pollen, etc. With proper maintenance protection exceeds 1 year.

Coating Installation Kit

Company: Gliptone

Coating Installation Kit for GT Quartz Ceramic Coating.

Contains:

- 1 foam block applicator
- 1 blue suede microfiber cloth
- 1 pair of XL black nitrile gloves

Ceramic Pro Textile

Company: Ceramic Pro

Ceramic Pro Textile reduces the surface energy of textile or suede. Superb hydrophobic effect. Liquid simply rolls off whilst keeping the textile substrate dry. Excellent durability.

Ceramic Pro Sport

Company: Ceramic Pro

Ceramic Pro Sport maintenance coating was designed for Ceramic Pro 9H. You can use Ceramic Pro Sport to maintain Ceramic Pro 9H to keep the super hydrophobic effect and also avoid water spots. Easy to install. Ceramic Pro Sport can also be used as a stand-alone coating.

Ceramic Pro Nano-Polish

Company: Ceramic Pro

Nano-Polish is the preparation process of the paint work as the final step to give the surface a high gloss and mirror effect. It is a water based solution with no abrasive particles.

Ceramic Pro Wheel & Caliper

Company: Ceramic Pro

Designed specifically to withstand extreme conditions, this protective coating is permanent and has a high resistance to heat (750 ° C), chemical substances and road salts. Brake dust and other containments won't bond. Not only will they be protected by a 9H hardness, they will also be protected by the hydrophobic and anti-graffiti properties of this coating so that your rims and brake calipers stay clean!

Ceramic Pro Rain

Company: Ceramic Pro

Ceramic Pro Rain protects windows from dust and water and provides excellent weather and UV resistance. This solution is particularly suitable for the treatment of car windshields and helmet visors. 110° hydrophobic effect. Lasts up to one year after application.

Ceramic Pro Leather

Company: Ceramic Pro

Ceramic Pro Leather has a super hydrophobic effect. It makes old leather look new. Liquids spilled bead up on surface and can easily be wiped away. The UV protection prevents the leather from aging.

Ceramic Pro 9H

Company: Ceramic Pro

Ceramic Pro 9H offers a permanent nanoceramic protective protection against minor scratches, graffiti, dirt, aging, premature oxidation, weathering, road salt, rock chips, bugs, bird droppings and even acid rain. Excellent thermal (1382°), UV, oxidation, corrosion and chemical resistance. The unique formulation of 9H has enabled it to be multi-layered which means the thickness of the coating can be increased with additional layers, allowing a thicker/harder film that will increase its scratch resistance. Can only be removed using machine polish.

Ceramic Pro Light

Company: Ceramic Pro

Ceramic Pro Light provides advanced chemical resistance and produces a high gloss finish. 110° hydrophobic effect. Weather, UV, oxidation and corrosion resistant. Ceramic Pro Light is often used as a top coat on Ceramic Pro 9H to enhance the hydrophobic effect and add more color, depth, and shine to the surface. Lasts up to 24 months.

Sonax Profiline CC36 Ceramic Coating

Company: Sonax

Hard-as-glass but flexible long term protection with exceptional resistance to UV light, chemicals, and aggressive environmental influences such as road salt, tar, and street and industrial pollution. The surface gets super hydrophobic, acts as dirt repellent and demands less maintenance effort due to the “Easy-to-Clean” effect. Gives an incredible deep shine with impressive color intensity. If properly maintained, CC36 can protect for up to 36 months.

8-piece set consisting of:

- Sonax Profiline BaseCoat
- Sonax Profiline GlossCoat
- Sonax Profiline Prepare
- 2 Application sponges
- 1 microfiber cloth
- 2 gloves

GT Quartz Professional

Company: Gliptone

Gliptone® GT Quartz Professional applies a unique dense molecular mesh of nano-structures to bond on the surface. Unlike conventional car waxes or sealants, this creates a hydrophobic coating that is extremely water and dirt repellent, while providing a durable UV resistant, long lasting (3-5 years) deep gloss surface. The

GT Extender

Company: Glyptone

GT Extender is a SiO₂ Ceramic-based liquid spray coating rejuvenator. This product was specifically designed to enhance and extend the hydrophobic and protection qualities associated with Glyptone's range of GT Quartz coating products. A single treatment on its own provide 2-6 months of protection against UV, detergents, contaminants, and pollution.

- Forms a semi-permanent heat resistant bond
- Use to maintain all previously coated surfaces of rims, paint, plastic and vinyl trim
- Use on wet or dry surfaces

Aero Coat

Specifically designed for race cars, snowmobiles, motorcycles and quads.

C1 Crystal Laquer

- 3 to 5 years durability
- Excellent swirl mark resistance
- Crystal clear finish

Liquid Crystal

4-8 months protection.

EXOv4 Ultra Durable Hydrophobic Coating

Ceramic coating. 18-24 months durability.

Crystal Serum Light

Ceramic coating 5 years durability

Panel Wipe

To remove residue before application.

Permanent Trim Restorer

To be applied on exterior trim.

Wheel Armour

Wheel coating

- 1 to 2 years durability

Clear Vision Smart Glass

Coating for windshield 2 years
